# PHARMACY

Madix has made it simple to design and create a pharmaceutical workspace that is efficient and comfortable for both employees and customers. Modular pharmacy fixtures outfit pharmacies with display shelving for the sales floor and Rx fulfillment lines for work areas. Display products improve sales out front, and service counters and shelving advance productivity in the back where pharmacists fill prescriptions.

## CUSTOMIZE

These pharmaceutical work spaces are as efficient as they are comfortable for the workforce. Modular pharmacy shelving, counter units, and Maxi Line shelving accommodate today's prescription area requirements. Customize the workspace with sliding panels and binning to greatly improve productivity.
