TUBE LINE

Madix's Tube Line is an alternative to Maxi Line for aisle and perimeter wall shelving. The line includes several options for shelves, merchandising, accessories, and back panels. With fewer snap-together parts, installation is simple in comparison to traditional systems

Combine standard Tube Line components to create unique systems and displays that lift sales. Madix's Tube Line Queuing Fixture System improves customer satisfaction and boosts sales of impulse merchandise. The Tube Line Fitting Rooms allow retailers to utilize all four sides of a dressing room by integrating slotting for shelves, wire grid panels, and optional accessories.

DISPLAY

Featured Accessories:

The Tube Line Lighted Header Shelf is one example of Madix's capability to provide customized graphics and lighting components that integrate with shelving systems to enhance sales.

Attractively and efficiently display soft goods with Madix's unique Display Bin System. Personalize the display with custom laser cutting and draw attention to merchandise with lighting and showcase areas.
