@Front Roller Shelf System

Create a perfectly stocked shelf instantly with @Front! @Front incorporates multiple small, rolling tracks that work with gravity to automatically feed cooler merchandise to front of shelf, cutting time and labor necessary for store merchandising and facing. Dividers can be easily adjusted in mere seconds, accommodating bottled, canned, and boxed goods of varying size and shape. Rolling-track system is fully integrated with the shelf itself, little to no maintenance required. Simply remove the entire shelf for a thorough wash, or wipe the rollers with a damp cloth to remove light dust and debris. Unique, patented design uses all plastic construction, allowing roller replacement from top surface (spare rollers integrated into bottom of every shelf). 5° downtilt improves sight lines for better visual impact than other gravity feed systems. Replaces cumbersome, spring pusher systems.

- @Front Roller Shelf System for Hussmann and Hill Phoenix Coolers
- @Front is the only NSF listed roller system due to patented design
- @Front feature: Landing zone to reduce/eliminate roller damage from dropped merchandise
- @Front snap-in design for replacement rollers; each roller mat includes a package of replacement rollers, attached to the underside of mat
- @Front design has drain for fluid; fluid collects and rollers become inoperative
- Easy to clean: remove mat and pressure wash due to all plastic construction
- Kits are packed two per carton: two shelf frames, two roller mats and two shelves of accessories

Create a perfectly stocked shelf instantly with @Front! @Front incorporates multiple small, rolling tracks that work with gravity to automatically feed merchandise to front of shelf, cutting time and labor necessary for store merchandising and facing. Metal dividers can be easily adjusted in mere seconds, accommodating bottled, canned, and boxed goods of varying size and shape. Rolling-track system is fully integrated with the shelf itself, little to no maintenance required. Simply remove the entire shelf for a thorough wash, or wipe the rollers with a damp cloth to remove light dust and debris. Unique, patented design uses all plastic construction, allowing roller replacement from top surface (spare rollers integrated into bottom of every shelf). 5° downtilt improves sight lines for better visual impact than other gravity feed systems. Replaces cumbersome, spring pusher systems.

@Front Shelf
- Provides more merchandising space and better visibility while saving labor and keeping shelves looking fully stocked
- More durable than other self-fronting systems like pushers and slip mats
- Patented system with 3 year warranty
- Clear Fronts available in 2", 3" or 4" heights (51 mm, 76 mm or 102 mm)
- Dividers available in 1" or 2" (51 mm or 76 mm) heights
- 36" ONLY available in 18", 22" or 24" (356 mm, 457 mm, 559 mm or 610 mm)
- Dividers adjust in ¼" (.318 mm) increments for maximum space efficiency
- Load capacity is 200 lbs
- Order roller mat and shelf frame separately
- Roller mat is available in beige or black finish, and 14", 18", 22" or 24" depths (356 mm, 457 mm, 559 mm or 610 mm)
- Roller shelf frame has weld-on tag mold standard; DGA2A, DGA2P (painted) aluminum price tag molding optional

3353 mm, 3658 mm)  
2 — Step 2 Only
The @Front G5 converts most standard Madix shelves into a self-fronting, gravity-feed system, cutting manual labor costs and time while making merchandise more accessible to customers.

@Front helps retailers maintain the appearance of a neat, fully stocked display almost effortlessly. Durable roller segments replace traditional spring-pusher systems to reduce shrink, minimize the number of mis-stocked items, and provide more flexibility for merchandising changes.

Order components for a complete system:
- @Front Pitch Converter - required to create a 6° to 7° downtilt (standard 15° downtilt is too steep for roller systems) or Downtilt Shelf 7° [DTS7-(NW)(ND)] can be used without pitch converter
- @Front G5 Rail Set
  - Features slots to attach a plastic front/guard to the lip of the shelf
  - Both ends of the Rail Set have provisions to snap-fit the roller track
  - Includes pine-tree fasteners for attachment to standard shelf perforations
- @Front G5 Roller Track - includes a single strip of rollers for smaller merchandise (use two or more tracks for larger/heavier merchandise)
- @Front G5 Divider
  - Snaps into the roller track to separate and retain merchandise columns
  - Adjusts left or right using integrated ratchet
  - Must be ordered in the same depth as the @Front G5 Roller Track
- @Front Plastic Front Retainer - clear plastic front available in 2”, 3” or 4” (51 mm, 76 mm, or 102 mm)

@Front Shelf Pitch Converter
- Downtilt of 6° to 7°
- Compatible with all Standard Upper Shelf [SUS-(NW)(ND)], Straight-in Insertion [STP(NW)] (ND), 18” (457 mm) or smaller
- Use of the Pitch Converter [AFP-(COLOR)] will increase the shelf depth by 2½ (64 mm)
  Example: When a 14” (356 mm) deep shelf is used with a Pitch Converter [AFP-(COLOR)], the overall depth will be 16½” (419 mm)
- Available only in beige or black

Downtilt Shelf 7°
- 7° single-position downtilt shelf
- Includes standard Standard Upper Shelf [SUS-(NW)(ND)] type perforations
- Most Standard Upper Shelf [SUS-(NW)(ND)] options (tag molding, etc.) are available with DTS7-(NW)(ND)

DTS7-(NW)(ND)
